

RAMESH MARELLA

McKinney, TX 75070 | [e-mail](#) | +1 650-255-9643 | [LinkedIn](#) | [GitHub](#)

Professional Summary

Visionary Enterprise and Cloud Architect with 15+ years of experience designing scalable, secure, and cost-optimized technology landscapes across FinTech, SaaS, and regulated industries. Proven track record of developing cloud transformation strategies, leading architecture governance, and aligning technology with enterprise-wide business goals. Skilled in building reference architectures, managing EA roadmaps, and leading ARBs to ensure cohesive design across domains. Experienced in emerging technologies, platform modernization, and driving innovation through proof of concepts and MVPs.

Tools & Technologies

Enterprise Architecture & Governance: Reference Models, Capability Mapping, Architecture Review Board (ARB), TOGAF-aligned principles, EA tools (e.g., LeanIX, Lucidchart, Archi), EA Roadmaps

Cloud Platforms: AWS, Azure, GCP, IBM Cloud(Certified)

DevOps & Automation: Terraform, Ansible, Jenkins, GitHub Actions, IaC, CI/CD

Observability & Monitoring: Dynatrace, CloudWatch, Azure Monitor, ELK, Datadog, Prometheus

Security & Compliance: Zero Trust, ISO 27001, SOC 2, GDPR, HIPAA, FedRAMP

Languages: Python, Bash, YAML, PowerShell

Other: FinOps, DR, SLA/SLO/SLI design, RCA, Architecture governance, Innovation lifecycle

Experience Highlights

EA | Taciti Consulting / Lam Research – Plano, TX (May 2024 – May 2025)

- Defined enterprise cloud architecture blueprint across five core platforms using AWS native services; ensured alignment with Lam's transformation strategy and security posture.
- Maintained capability maps and tech roadmaps, facilitating communication between business strategy and architectural planning.
- Led enterprise-wide Architecture Review Board (ARB) for cloud modernization, creating reusable architectural assets for multi-region DR and auto-healing deployments.
- Partnered with platform architects to standardize CI/CD, observability, and disaster recovery using Terraform and GitHub Actions.
- Evaluated emerging technologies and delivered MVPs for innovation pilots aligned with strategic themes.

EA | EZ4 Technologies – Plano, TX (Mar 2023 – Apr 2024)

- Guided enterprise-wide SRE architectural strategy with standardized IaC stacks and reusable patterns, aligned to governance policies.
- Established reference architecture documents for microservices hosted in AWS, covering availability, failover, and scaling.
- Developed observability standards and SLO dashboards used by cross-functional teams and presented findings at monthly governance forums.
- Assessed architectural redundancies and recommended consolidation strategies for application modernization.

EA | Blue Yonder – Scottsdale, AZ / Dallas, TX (Jan 2021 – Jan 2023)

- Acted as architectural liaison between FinOps and engineering, leading application portfolio rationalization and cost reviews.

- Maintained cost and performance heatmaps, influencing cloud service design and lifecycle policies.
- Built compliance-ready monitoring frameworks for AWS services integrated into the broader enterprise technology strategy.
- Facilitated reuse of FinOps tagging standards and lifecycle automation templates across delivery teams.

EA | Magtech Consulting / Fast.co – Manville, NJ (Nov 2018 – Jan 2021)

- Defined and implemented modular architecture patterns for a cloud-native data lake, ML pipelines, and analytics workloads using AWS Glue, EMR, and SageMaker—aligning infrastructure design with long-term data strategy.
- Architected microservices using ECS, EKS, and Fargate with reusable deployment templates, ensuring consistent design across environments and improving system modularity.
- Conducted architectural reviews for resource optimization and cost governance; executed rightsizing audits and RI modeling that led to a 35% reduction in AWS spend without service degradation.
- Delivered analytics dashboards in Amazon QuickSight, democratizing access to real-time insights and supporting data-driven decision-making across business domains.
- Collaborated with data, ML, and application architects to align cloud architecture blueprints with enterprise standards and compliance policies.

EA | Micronet Technicks Pvt Ltd / Fast.co – Bangalore, India (Dec 2016 – Oct 2018)

- Spearheaded the implementation of Zero Trust architecture principles across cloud platforms, leveraging IAM, MFA, GuardDuty, KMS, and AWS Config in alignment with enterprise security frameworks.
- Defined and enforced cloud security compliance standards (ISO 27001, SOC 2, GDPR), embedding them into architecture decisions and leading successful audits across cloud operations.
- Designed and conducted disaster recovery drills across AWS multi-AZ and multi-region setups, contributing to a 99.9% SLA for critical services and influencing the broader enterprise DR strategy.
- Partnered with solution architects to integrate security controls into CI/CD pipelines using Jenkins and AWS-native tools, driving shift-left practices in cloud DevSecOps.
- Advised engineering leadership on architectural guardrails and governance models for secure and compliant delivery across business-critical platforms.

EA | Wipro Technologies – USA, UK, India (Nov 2002 – Nov 2016)

- Served as Enterprise Architect for global clients, defining enterprise IT strategies for Datacenter, Cloud, and SAP/Salesforce platforms.
- Designed hybrid cloud strategies, integrating PaaS/IaaS solutions with regulatory standards (FedRAMP, HIPAA).
- Led architecture governance bodies and guided solution architects through standards and policy compliance.
- Supported innovation pilots and proofs-of-concept to evaluate new platforms and inform IT strategy.

Education

MSITM (2018-2020), MBA in IT (2023-2024), MSDSAI (in progress) – Campbellsville University
 Doctorate in Strategic Leadership (in progress) – Liberty University
 IBM Cloud Solutions Architecture(Certified), AWS(Planned), TOGAF(Planned)
